

Product Name: EDTA

Cat. No. 2811

Solubility Guidelines:

This product is soluble in water at room temperature up to 5mM (approx. 1.5mg/ml). The pH of this solution will be approximately 3 to 3.5. However, this compound becomes much more soluble as the pH increases. This can be achieved by gradual addition of a concentrated solution of aqueous sodium hydroxide. The solubility at pH 9 is >100mM.
